Health Education and Training Institute Higher Education Referencing Styles Policy

Policy Statement

Referencing sources of information is an essential part of most academic activity. Correct citation according to Health Education and Training Institute (HETI) Higher Education framework requirements is an important component of expression of ideas in academic work. Many students experience difficulty in using referencing appropriately and consistently. This situation is exacerbated where students are directed to a variety of requirements and styles across units. A consistent approach and clear guidelines assist in maintaining appropriate academic standards and helps students to reference their work correctly. Incorrect referencing can lead to allegations of plagiarism, which are treated as student academic misconduct, and can have serious consequences for students.

Aims and Objectives

This policy aims to:

1. Encourage academic integrity and rigour by providing clear and consistent referencing guidance to students.
2. Direct students to the preferred referencing software tool EndNote.
3. Provide a framework for academic staff involved in the preparation of learning and teaching materials in presenting those materials in a manner consistent with this policy and the framework in which they teach.
4. Reduce incidences of unintentional plagiarism arising from lack of, or incorrect, acknowledgement or citation of sources of information within student work. Failure to correctly acknowledge information sources can constitute plagiarism and may incur academic penalty as set out in the Student Academic Misconduct Policy.

Definitions

5. For the purposes of this policy:
 - a. Referencing style refers to a formal recognised system for presenting sources of information presented in academic work and listed in the bibliography or reference list.

Procedures

6. HETI Higher Education has endorsed two referencing styles:
 - a. American Psychological Association (APA) (6th Ed.) for use in the Applied Mental Health Studies framework;
 - b. Vancouver for use in the Psychiatric Medicine framework.
7. Students are informed of the referencing style to be used in the Unit Learning Guide.

Roles and Responsibilities

8. The Unit Coordinator is responsible for providing guidance to students on the referencing style indicated in the Unit Learning Guide.
9. Guidelines for the approved referencing styles are provided by library services on the HETI Higher Education website.

Supported Bibliographic Management Software

10. HETI Higher Education provides access to the online bibliographic management program EndNote. This is a standard software tool for publishing and managing bibliographies, citations and references.
11. Students and staff are able to access EndNote training and support via the library page on the HETI Higher Education website.
