Health Education and Training Institute Higher Education External Advisory Committees Policy

Policy Statement

An External Advisory Committee's principal function is to provide advice on the relevance of courses and proposed courses to prospective students, the health sector, professional bodies and to the community, adopting open and transparent processes. A Committee may also facilitate networking with the health sector and the community generally to leverage collaborative ventures, foster support for Health Education and Training Institute (HETI) Higher Education, attract donations for scholarships, and provide opportunities for research collaborations. With appropriate membership, the Committee may provide expert advice about curriculum design standards for current or proposed courses.

Aims and Objectives

1. An External Advisory Committee (or committees) may be established to provide advice over an extended period of time - from inception of a particular course or courses, through to their being offered to students. Alternatively, the Committee might be commissioned for a limited duration, to undertake a particular task - for example, to review a particular course that is due for re-accreditation.

Overview

2. This policy is to be read in conjunction with the Award Courses and Units Approval Policy. As part of the process of developing and considering proposals for new courses, or for substantial variations to existing courses, there is a requirement to establish processes to obtain external input to the proposals. External Advisory Committees are one way to achieve this.
3. HETI Higher Education recognises that an External Advisory Committee is not the only way to obtain evidence, advice, information, external views, and feedback on courses and course proposals.
4. Other sources of information might include:

- a. reports which include data on student demand, enrolments, retention, progression, completions, graduate outcomes;
- b. student feedback from course and unit surveys; and
- c. other inputs from the NSW Health system, the wider health sector, partners in the delivery of courses and programs and professional bodies.

Roles and Responsibilities

5. In establishing an External Advisory Committee, or committees, the Director Education and Training will, in consultation with the HETI Higher Education Executive Group:
 - a. determine the Committee's terms of reference
 - b. appoint an external chair; that is, an individual *who is not* employed by HETI;
 - c. propose the appointment of the members of the Committee (including, if considered necessary a deputy chair). A majority of members must be external to HETI Higher Education, for example, graduates, relevant professionals, academic staff at other institutions;
 - d. decide how often the Committee should meet, and whether meetings are face-to-face or electronic, taking into account the wishes of the Committee; and
 - e. arrange the Committee's administrative support.
6. The External Advisory Committee's reports will be referred to the HETI Higher Education Academic Board via the Teaching and Learning Committee.
